VICTORY CHUKWUMA

Product Designer | 0 to 1 Products, Complex Workflows and Design Systems

Lagos, Nigeria | +234 810 625 8307 | victorychukwuma2@gmail.com | designwithvee.framer.website | linkedin.com/in/victory-chukwuma

PROFILE

Product designer at Skydd and founder of LOQD combining strategic product thinking, end-to-end ownership and hands-on UX and UI craft across consumer, fintech, safety and operational products. Works cross-functionally from research and problem definition through prototypes, scalable interface systems and developer-ready delivery.

EXPERIENCE

Product Designer | Skydd **Jul 2025 - Present**

- Shaped a consumer financial-protection experience that brings saving and protection into one clear proposition for Nigerians.
- Designed the waitlist journey that attracted [100+] sign-ups and converted [95%] of visitors into prospective users.
- Owned 3 connected website journeys from problem definition to responsive UI: Home, FAQ and About, simplifying complex product and trust messaging.
- Extended 5 design-system foundations: typography, colour, buttons, grid and components, improving visual consistency and cross-functional developer handoff.

Founder | LOQD **Apr 2026 - Present**

- Defined product strategy and service design for an event-based belongings storage and custody venture.
- Led 9 attendee interviews and translated findings on trust, pricing, access and retrieval speed into product strategy, service requirements and pilot decisions.
- Designed the end-to-end service and digital MVP across customer, counter and runner experiences, including offline fallbacks, four custody checkpoints, operational metrics and a modular 125-space model.

Co-Founder and Product Designer | Juju Games **May 2023 - Present**

- Co-founded the studio and led interface design across Vodou: A Space Odyssey, Boju Boju and Payton Ville, covering HUDs, inventory, quests and reusable visual systems.

Product Designer | The Cypha **Feb 2024 - Feb 2025**

- Designed SKRHYB's dual-user CMS and dashboard, led GLOBLSERVICE product design and created a reusable system spanning 3 platforms.

Earlier experience: Product Designer, Vroom Ng (2023-2024) | Product Designer, Hydrogen HR (2023)

SELECTED PRODUCT WORK

MEELOW Defined product architecture and end-to-end mobile flows across 9 safety, fintech and operational areas, including Smart Check-In, live monitoring, geofencing, escalation, wallet, payments and administration.
COUPON Designed and audited consumer and admin fintech flows across 7 product domains, including investments, KYC, transactions and withdrawals; resolved conditional paths, duplicate screens, system states and error recovery.
