PROFILE

Product designer at Skydd and founder of LOQD, building digital products from Nigeria. I work across product strategy, UX, interaction design, prototyping, design systems, and early validation—turning complex ideas into clear, usable products.

CAPABILITIES

Product strategy • Product design • UX research • Interaction design • Design systems • Prototyping • Product management • Design leadership • 0→1 venture building • Go-to-market thinking

EXPERIENCE

Product Designer — Skydd Jul 2025–Present

- Design digital products from early discovery through delivery, working across product strategy, UX, interaction design, prototyping, and scalable systems.

Founder — LOQD Apr 2026–Present

- Building LOQD from 0→1 across product vision, strategy, brand, UX, go-to-market, and early validation.
- Exploring early-stage products including Meelow and Coupon.

Co-Founder — Juju Games May 2023–Present

- Co-founded the studio and led interface design across projects including Vodou: A Space Odyssey, Boju Boju, and Payton Ville.
- Shaped game UI, HUDs, inventory flows, quests, and visual systems with a small cross-functional team.

Product Designer — The Cypha Feb 2024–Feb 2025

- Designed SKRHYB's dual-user CMS and dashboard; led product design for GLOBLSERVICE; built a design system across three platforms.

Product Designer — Vroom Ng Aug 2023–Aug 2024

- Designed rider and driver apps, CMS dashboards, brand experiences, and gamified features.

Product Designer — Hydrogen HR Jan 2023–Jul 2023

- Delivered payroll and management UX for an enterprise dashboard through user journeys, prototypes, and production-ready interface design.

SELECTED WORK

LOQD • Meelow • Coupon • Skydd products • SKRHYB • GLOBLSERVICE • Vroom • Vodou: A Space Odyssey
