VICTORY CHUKWUMA

Product Designer | 0 to 1 Products, Complex Workflows and Design Systems

Lagos, Nigeria | +234 810 625 8307 | victorychukwuma2@gmail.com | designwithvee.framer.website | linkedin.com/in/victory-chukwuma

PROFILE

Product designer at Skydd and founder of LOQD with experience shaping consumer, fintech, safety and operational products. I work from research and product definition through complex flows, prototypes, scalable interface systems and developer-ready delivery.

EXPERIENCE

Product Designer | Skydd **Jul 2025 - Present**

Designing a consumer financial-protection experience that brings saving and protection into one clear proposition for Nigerians.

- Designed connected Home, FAQ and About journeys, turning complex product and trust messaging into an accessible, responsive web experience.
- Extended the typography, colour, button, grid and component system across new pages, improving consistency and creating a clearer developer handoff.

Founder | LOQD **Apr 2026 - Present**

Leading product strategy and service design for an event-based belongings storage and custody venture.

- Led 9 attendee interviews and translated findings on trust, pricing, access and retrieval speed into product principles, service requirements and pilot decisions.
- Designed the end-to-end service and digital MVP across customer, counter and runner experiences, including offline fallbacks, four custody checkpoints, operational metrics and a modular 125-space model.

Co-Founder and Product Designer | Juju Games **May 2023 - Present**

Co-founded the studio and led interface design across Vodou: A Space Odyssey, Boju Boju and Payton Ville, covering HUDs, inventory, quests and reusable visual systems.

Product Designer | The Cypha **Feb 2024 - Feb 2025**

Designed SKRHYB's dual-user CMS and dashboard, led GLOBLSERVICE product design and created a reusable system spanning three platforms.

Earlier experience: Product Designer, Vroom Ng (2023-2024) | Product Designer, Hydrogen HR (2023)

SELECTED PRODUCT WORK

MEELOW Defined product architecture and end-to-end mobile flows for a safety and fintech platform spanning Smart Check-In, live journey monitoring, geofencing, automated alert escalation, wallet, payments, cards, support and administration.
COUPON Designed and audited consumer and admin fintech flows across investments, portfolios, KYC, transactions, withdrawals, rollovers and support; resolved conditional paths, duplicate screens, system states, error recovery and developer-facing navigation.

TOOLS AND METHODS

Product strategy | Product discovery | User interviews | Information architecture | Interaction design | Prototyping | Usability testing | Design systems | Service design | Responsive web and mobile | Developer handoff | Figma | FigJam | Framer | HTML/CSS
